CALL FOR PAPERS

Context:

The rapid evolution of digital technologies and the rise of Artificial Intelligence (AI) are transforming economic, social, and political dynamics on a global scale. These technologies pose critical challenges regarding corporate sovereignty, individual freedoms, and personal data protection. As digital networks become essential infrastructures for social and economic interactions, the issues of control and governance over personal data are increasingly central.

These research days aim to bring together scholars from various disciplines, consultants, businesses, local authorities, and other stakeholders to explore the role of AI and networks in safeguarding digital sovereignty while respecting individual freedoms.

Thematic Areas:

Submissions are welcome on the following themes (non-exhaustive):

- AI and Digital Sovereignty:
    - Strategies to ensure corporate and national sovereignty in the face of AI
    - AI's role in creating new governance paradigms
    - AI and cybersecurity: Challenges and opportunities for states and businesses

- Individual Freedom and Data Protection:
    - Issues surrounding personal data protection in the AI era
    - Impact of AI technologies on individual rights and freedoms
    - Data protection strategies in a globalized digital environment

- Economic and Societal Impacts:
    - Analysis of new economic dynamics driven by AI
    - Transformation of work relationships and required skillsets
    - AI, social inequalities, and equitable access to technologies

- Legal and Ethical Perspectives:
    - Legal frameworks for AI use and data protection
    - Ethical challenges related to the development and application of AI technologies
    - Right to digital oblivion and other emerging rights in the AI era

- Technologies and Cybersecurity:
    - New technologies for data protection and security
    - Threats and vulnerabilities in the current digital environment.
    - Role of network infrastructure in digital sovereignty

- The New Landscape of Economic Warfare:
    - Limits of absolute cybersecurity
    - Cybersecurity for all and by all
    - Mobilizing stakeholders to promote responsible behavior
